Uniform Design Instructions

Remember, the price is the same no matter how many colors you choose in your printing, so have some fun with it. Don't worry about making the text size or placement perfect. We will make sure everything is centered and proportionally correct.

- Your 1st (Primary) color is your main body color. Color 2 and 3 are accent colors. **Please note, colors on your screen may differ from the actual color.** We have printed color swatches and sample jerseys in store for your reference. If you have time, we recommend stopping by our store to look at the colors. Press the Next button to see the design templates.
- Click on a design. You will be able to adjust the colors again in the next step.
- Hover over a color square to preview a different color. To create an ombre look, click the Gradient bar, choose two colors and click the Black/white box. Click the checkered box to remove it.
- You can also add a fill like Camo or Carbon Fiber by clicking on the Pattern bar and choosing a color. Location 2 and 3 are great places to add a pattern.
- Continue finalizing your colors in all of the locations.
- At the top of the box, Click on **Names/Numbers**
- Under Team Name, click ADD TEXT. If you want a logo instead of a team name, you can add it in a later step.
- Type in your team name. The size of the text will be adjusted to fit proportionately to each jersey.
- Click the "FONT & COLOR" bar to change the font and text. If you have a custom font that you would like to use, please contact the store to discuss the options. Use the Varsity font as a placeholder for your text.
- Click Outline to add an outline color (recommended to tie in any accent colors).
- Click Outline 2 to add an outline color.
- Add a Front Number if desired. We do not recommend it for younger teams due to the space on a small jersey.
- Add a Player Name on back if desired. Last names are discouraged for teams younger than 6U for safety reasons. We will make name printing available on the coach and fan jerseys.
- Click Back Number and ADD TEXT- **Change the size to our standard 6" size.** The number may look small on the mock up, but it is the proper size on a youth jersey. We will adjust/center the number placement.
- Add sleeve numbers if desired.
- Logos and Flags can be added anywhere on the jersey. You can select a stock image or you can upload your own image. If you upload a logo, it must be in vector format (eps, svg or ai). You will also need to email us the logo file. If you are unsure about vector artwork, we will review your logo file and let you know. If it is not in vector format and you want an exact image or logo, we can recreate it for a $10-$50 art fee depending on the complexity of the design. We use https://stock.adobe.com, type in a search term, adjust the filter (on the left) in subcategory to VECTOR and send us the image or the file number. There is a one time $10-$25 charge depending on the design. We have additional stock images available at no charge that are not on the builder. You can always send us a screenshot or description of your idea. Please allow 24-48 hours for a proof. For the fastest service, it is best to use the stock images on the builder.
- Click the blue SHARE DESIGN button under the image. You will be prompted to Register (which is quick and easy) or Log in if you already have registered.
- You will also be prompted to Save your design before sharing. Please use your Team Name AND Coach's last name in the design name. You may need to click SHARE DESIGN again.
- Click the image of the Envelope/Email Design button or you can email us the link with your logo file or idea.
- Enter TEAMSALES@H5SPORTS.COM in the Dealer's Email(s): This is very important.
- You can also add any additional information or design idea/help requests in the NOTES section.
- We will review your design and email you with any recommended changes.
- It is a good idea to download your design.

If there is anything you would like to do that isn't on the builder, please come to our store to work with one of our design experts. We can help create virtually any design or pattern. You can also request any custom CMYK color.
